Lifts even your spirit

Story of Liongrip

Liongrip originates from our customers' need to handle core shafts. It was conceived in 2007 to facilitate heavy lifting combined with smooth handling.

Liongrip is ergonomics

With essentially no effort, your employees are now able to move loads of up to 200 kg anywhere in a radius of up to 4 meters and a height of up to 2 meters. Liongrip's agility makes every working position a comfortable one. Injuries are avoided and sick leave is reduced.

Liongrip is profitable

The simple design, the durability, the ease of installation, the superior handling, the versatility; Liongrip is cost-effective in all aspects.

Every plant equipped with pneumatics (6 bar) and electricity (220 volts) can install a Liongrip without other investments.

Liongrip is fun

You may have to try Liongrip to believe it, but moving 200 kilograms at the tip of your finger never ceases to amaze. It even lifts your spirit.

Custom made to the max

Shaft handling

Adapted to the operator

Reel handling with tilting

Vacuum
Magnets
Grippers
Forks

SPECIAL ADAPTATIONS

If above specifications don't suffice, please contact us.

About Hofpartner AB

Hofpartner develops, manufactures and markets lifting aids, reel shafts and chucks. Our trademarks are AMAL-SHAFT®, Schlumpf and LionGrip®. Our customers can be found in nearly all manufacturing industries.

Hofpartner has dealers in several countries.

www.hofpartner.se

Hofpartner is located by Vänern's west bank in Åmål. All design is done here, and most of the manufacturing is done in our workshop with both manually and numerically controlled machinery.
